An organized, confident problem solver who enjoys challenges; exceptionally able to add value to an organization.

---

## EXPERIENCE

---

### **Founder / Senior Web Developer**

Aug 08 - PRESENT

#### *Zoolu Web*

- Founded Zoolu Web to provide local businesses with high quality web solutions with an affordable price tag.
- Responsibilities include creation and implementation of web applications and sites through all stages including concept, design, development, deployment, and support.
- Worked closely with clients to develop project schedule, manage expectations and deliverables.
- Hired and trained intern developers.
- Developed custom cms web application as well as custom asset management system.

### **Senior Web Developer**

Jan 08 – Aug 08t

#### *Live Technology*

- Primary responsibilities include design and development of LiveAdMaker Web Application.
- Interfaced with CEO, COO, and Product Manager to manage priorities developers tasks as well next phases of development.
- Part of team that developed, designed, and moderated core LiveObject JavaScript Library.

- Led team of senior developers to develop the LiveObject Web Application core platform.
- Hired, trained, and reviewed developers.
- Worked troubleshoot and debug IE memory leaks.
- Lead Developer on LiveForm API - JavaScript library for drawing forms and inputs, using ajax request to save values. Also includes server side development for retrieval of forms.
- Designed DataType API – describes how properties on objects can be fetched, stored, and formatted.
- Worked with Senior Technical Engineer to determine coding standards as well as documentation for developers.

### **Solutions Architect**

Nov 06 – Jan 08

#### *Live Technology*

- Led team of 3 to 8 developers.
- Lead Developer for Att AdWorks Print Automation System - <http://www.adworks.wireless.att.com/>
- AttAdWorks generates over 500 ads a week and are display in newspapers throughout the country.
- Developed listing PDF builder.
- Creating store listing and publication manager for Att AdWorks system.
- AttAdWorks generates over 500 ads a week and are display in newspapers throughout the country
- Lead Developer for Dell Darwin Print Automation System – <http://dell.ddblink.com>
- Managed and developed on Brand On Demand Bank Of America system - [brandondemand.liveadmaker.com](http://brandondemand.liveadmaker.com), MRC International Trucking system - [mrc.liveadmaker.com](http://mrc.liveadmaker.com)
- Lead Developer on AllState Brand Central - [allstatebrandcentral.com](http://allstatebrandcentral.com)
- Contributed code to core LiveLayout module which creates PDF files. Used in print automation systems to create advertisements.
- Meet with clients such as BBDO, DDB, OMD to discuss projects and deliver solutions.
- Wrote Bulk Edit / Upload Manager. Allows clients to upload multiple files onto a server and automatically pick up and index based on file name. Bulk Edit allows one form to update multiple assets / objects in the system.
- Created job order module – allows users to choose templates for their ads, customize templates, choose which newspapers they would like to ship the ads to. Once users are done customizing ad, they build ads, approve them, and then finally traffic them to their destination.
- Wrote LiveJSON Pad – C# Application to parse JSON and spit out in a treeview. Useful for developers debugging AJAX applications.

### **Web Developer**

Oct 04 – Nov 06

#### *LiveTechnology*

- Developed contact management system to help users add/remove/modify contacts and record journal activities.
- Worked on intranet sites for Omnicom Advertising and their clients – including FedEx and McDonalds.
- Created Slide Slicer Web Application for OMD New Business System – allowed users to upload PPT files and slice up and save each page separately. Files are then put into a global library where users can pick from and combine.
- Integrated flash map on <http://www.omid.com>. Wrote script to dynamically generate xml to feed the flash file.
- Learned proprietary programming language LSML and object oriented database – LiveOODB.

- Worked closely with application developers to improve performance of PDF and Graphic servers.

**Tech Support / Website Maintenance**

Feb 03 – Oct 04

*Easy CGI*

- Created two flash tour files.
- Debugged client scripting errors, email problem, and DNS configurations.

**FreeLance**

Sept 98 – Oct 04

*PB Design*

- Designed, developed <http://drusal.com> – Cosmetic Surgery Site.
- Developed PHP Web Application with Object Relational Interface to MySQL
- Created political form site MyDemocracy - <http://paulbouzakis.com/index.php> using PHP PostNuke CMS.
- Create websites for local bands – Rydia, Interference, and D.D.F.

**Graphic Designer**

Sept 98 – Feb 03

*21<sup>st</sup> Century Design*

- Assisted lead graphic designer work in creating advertisements.
- Problem-solved hardware issues with fault-tolerant hard drives.

---

EDUCATION

**Manhattan College**

2002

*Riverdale, NY*

- B.S., Computer Science
- Minor in Mathematics
- 3.5 / 4.0 GPA

---

HONORS

- LiveTechnology 2006 Employee Of The Year
- 7 LiveTechnology Employee Of The Month Awards
- Deans List All Four Year at Manhattan College
- Epsilon Sigma Pi – Manhattan College Honor Society
- Tau Sigma Kappa - Computer Science Honor Society
- Pi Mu Epsilon - Math Honor Society

---

INTERESTS

- Physics, Guitar, Recording/Writing Music, Reading, Politics
